Go Green for Spring ...Now!

*Yard Green lawn painting system gives turf a jump start on spring growth;
'Good for the grass, good for the environment'*

DULUTH -- Community Bridge landscaping company is introducing Yard Green -- a lawn painting system that brings back green grass and promotes spring growth – in a most environmentally friendly way.

Residents here in metro Atlanta still have weeks of chilly temperatures ahead, yet turf experts say that now is exactly the right time to be planning for a beautiful spring lawn.

“Community Bridge is very excited to be licensed and trained to offer the Yard Green lawn painting system – a process that’s good for your grass and good for the environment,” says Carla Haynes, chief operating officer, Community Bridge of Atlanta.

Yard Green lawn paint was designed for grass that goes dormant in the winter, explains Haynes. “Our trained technicians apply the paint, using edging boards to protect the home, sidewalks and driveways. The color can even be varied depending on the way the product is mixed.”

Not only do homeowners enjoy an instantly transformed, lush green yard, but they are also encouraging spring growth.

“Yard Green is very environmentally friendly. It’s ammonia-based and it turns to nitrogen to fertilize the lawn,” Haynes says. “Yard Green increases the soil temperature, which helps bring the lawn out of dormancy. And it’s all done using very little precious water!”

Yard Green is also completely non-toxic with no harmful chemicals, and is safe for children and pets. The application, which lasts for about three months, dries in about 30 minutes and won’t bleed or run.

As spring and summer approach, the benefits of Yard Green are abundant. The yard painting system, which does not change the texture of the grass, produces a green lawn without the expense and hassle of seeding and fertilizing. Benefiting the environment, Yard Green preserves water and helps to maintain green lawns in areas that are subject to watering restrictions.

“When I drove around the corner, I could see my green lawn and it looks better than anybody else’s lawn in the neighborhood. I’m very, very surprised and very pleased at the outcome. It looks very natural,” says homeowner Britney Bowe, of Suwanee.

Call (678) 957-0225 or visit www.Community-Bridge.com to learn more about Yard Green and the other comprehensive landscaping services the company provides.

Established in 2002 in Washington, D.C., Community Bridge landscaping company expanded to metro Atlanta last year and has offices in Duluth.
